PROFILE SUMMARY

Enthusiastic Flutter Developer with a solid foundation in Dart and mobile app development. Skilled in creating cross-platform apps with a focus on UI/UX design and performance. Eager to apply my knowledge and grow in a dynamic team, contributing to innovative mobile projects.

PROJECTS

Flutter Chat App (*Personal Project*)

📌 **Tech Stack:** Flutter, Dart, Firebase Authentication, Firestore, Provider

- Developed a **real-time chat application** using Flutter and Firebase, enabling seamless communication between users.
- Implemented **Firebase Authentication** to allow users to sign in anonymously, ensuring a quick and frictionless onboarding experience.
- Integrated **Cloud Firestore** as a NoSQL database to store and sync messages in real time.
- Utilized **StreamBuilder** to display live chat updates without requiring manual refresh.
- Designed an intuitive **Material Design-based UI** with a responsive layout for different screen sizes.
- Added **message timestamps** and structured data storage to maintain conversation history efficiently.
- Implemented **basic state management** with Provider for handling user authentication states.
- Deployed on both **Android and iOS**, ensuring cross-platform compatibility.
- Hosted the project on **GitHub** with detailed documentation for easy collaboration and future improvements.

Flutter To-Do App (*Personal Project*)

📌 **Tech Stack:** Flutter, Dart, Firebase Firestore, Provider (if used for state management).

- Built a **To-Do List app** using **Flutter** and **Firebase Firestore** for real-time task management.
- Implemented **CRUD operations** (Create, Read, Update, Delete) to manage tasks dynamically.
- Used **StreamBuilder** for real-time updates without manual refresh.
- Integrated **Firebase Authentication** (optional) for user-specific task lists.
- Designed a **Material Design UI** with smooth animations and state management.
